#### University Project

- Designed and implemented a Research Management System using Next.js, optimizing research project workflows within a university environment. Simplified proposal submissions, review procedures, and project monitoring for enhanced efficiency.

### Experience

#### Batangas State University - Steer Hub

Front-end Developer Intern

#### GCH Alangilan, Batangas City

August 2024 - December 2024

- Collaborated on the front-end development of a research management system portal for the university, aiming to improve organization and tracking of research projects and related activities.
- Utilized skills in software engineering, web development, and project management to contribute to the successful completion of the project.
- Assisted in the ongoing development of the research management system, ensuring that new features are seamlessly integrated and existing functionalities are optimized.

#### Batangas State University - Steer Hub

Fullstack Web Developer Intern

#### GCH Alangilan, Batangas City

June 2024 - July 2024

- Developed a web-based SOS application that enhances user safety by transmitting real-time location and captured images to the admin.
- Designed and implemented geolocation services, image capture handling, and secure data communication using modern frontend and backend technologies.
- Delivered a robust, user-friendly, and efficient solution for emergency situations with seamless integration and real-time data transmission.

### Leadership & Activities

#### Junior Philippine Computer Society- BatState-U Alangilan

Associate Director for Marketing and Publication

#### GCH Alangilan, Batangas City

June, 2021- Present

- Led marketing and publication initiatives for JPCS BatState-U Alangilan, enhancing student engagement and organizational visibility.
- Managed promotional materials and digital content to support events and organizational activities.
