JERICHO JAMES MILLENA

FULLSTACK DEVELOPER

PROFILE

Driven and innovative Full-Stack Developer with comprehensive expertise in designing and implementing scalable web applications. Proficient in both frontend and back-end development, with a focus on delivering user-centric, responsive, and high-performance solutions. Proficient at utilizing modern frameworks, tools, and programming languages to build seamless web applications that meet client and business requirements.

WORK & PROJECT EXPERIENCE

Public Dashboard

AUGUST, 2024 - DECEMBER, 2024

Frontend Development

- Designed and developed a public dashboard for showcasing research projects across various campuses, accessible to all users.
- Integrated interactive visualizations, filters, and search functionalities to improve user engagement and data exploration.
- Ensured a responsive and user-friendly interface optimized for both desktop and mobile devices.

Ligtas App

JUNE, 2024 - JULY, 2024

Fullstack Web App Development

- Developed a web-based SOS application that enhances user safety by transmitting real-time location and captured images to the admin.
- Designed and implemented geolocation services, image capture and handling, and secure data communication using modern frontend and backend technologies.
- Delivered a robust, user-friendly, and efficient solution for emergency situations with seamless integration and real-time data transmission.

HealthSync App

AUGUST, 2023 - DECEMBER, 2023

Mobile App

- Developed HealthSync, a web-based application that allows users to schedule appointments with doctors seamlessly.
- Implemented features such as real-time appointment booking, doctor availability management, and secure user authentication.
- Ensured a responsive and intuitive user interface, optimizing the app for both desktop and mobile platforms.

TECHNICAL SKILLS

Front-End Development: Next.js, React.js, Tailwind CSS, JavaScript/TypeScript

Back-End Development: Node.js, Express.js, RESTful APIs, WebSockets

Database Management: MySQL

DevOps & Tools: Git
